UNIVERSITY PROJECT

SEA WAY BORDER ALERT SYSTEM USING RSSI

The Technology Proliferation of Received Signal Strength Indication (RSSI) is used to Provide Location Based Positioning in All Climatic Conditions and Even Anywhere and At Any Time. This Method Focuses on Implementing Border Identification System in the Boats to Help the Fisherman. The Proposed System Alerts the User by Giving Buzzer Sound and LED Lights Indication When the Boat Enters into the Danger zone. As the Boat Moves, The Zone in Which The Boat and the Signal Strength Will be Displayed in the Mobile Phone. The RSSI is used to Set the Range in the Sea by Which The Fisherman Can Easily Identify The Sea Border and Can Prevent Them from Imprisonment.
