

Professional Summary:

- Having 2.6 years of programming experience as an **Oracle SQL & PL/SQL** Developer in the Analysis, Design and Implementation of Business Applications using the Oracle Relational Database Management System (RDBMS).
- Experience in creating database schema objects such as **Tables, Views, Sequences, Synonyms** and **Index**.
- Expertise in using **DDL (Data Define Language)**, **DML (Data Manipulation Language)**, **DCL (Data Control Language)**, and **TCL (Transaction Control Language)** commands.
- Strong knowledge in writing complex queries which include **Joins, Sub query, Group Functions, Set Operators, Pseudo Columns** and **Analytical Functions**.
- Having knowledge of creating **Simple Views, Complex Views** and **Materialized Views**.
- Involved in loading data flat files into Oracle tables using **SQL Loader**.
- Developed complex database objects like **Stored Procedures, Functions, Packages** and **Triggers** using SQL and PL/SQL.
- Have good knowledge in **Cursor** implementation and **Exception Handling** to handle errors in PL/SQL subprograms.
- Involved in advance PL/SQL constructs like **Collections (Index by Table, Nested table and Varray)**.
- Basic knowledge in **Bulk Collect (FORALL, LIMIT, BULK EXCEPTION HANDLING)** to improve the performance of multi-row queries by reducing the context switching.
- Having basic knowledge in **Performance Tuning** by analyzing **Explain Plan**.

Work Experience

Working as a **Software Engineer** at **THINCLESOFT TECHNOLOGIES**, Chennai from **Oct 2019 To till date**.

Tools used

Database	: Oracle 11g, 12c (SQL and PL/SQL)
Client-side tool	: SQL Developer, SQL Plus, and PL/SQL Developer
Ticket Tracking	: JIRA
Version Control	: SVN
Other Tools	: Win merge, WinSCP

Description:

Sonos, Inc. is an American developer and manufacturer of audio products best known for its multi-room audio products. The company was founded in 2002, The headquarters are located in Santa Barbara, California, sonos produces Speakers, Portable speakers, Soundbars, Subwoofer, Components. In addition, through a partnership with IKEA, the following speakers are also part of the Sonos ecosystem are Bookshelf, Lamps, Picture frames. The company grew to become the one of the leading developer and manufacturer of audio products in the world.

Roles and Responsibilities

- Analyzed the business requirements of the project by studying the business requirement Specification documents and try to convert that requirement to SQL queries or PL/SQL
- Worked as per the Work Request and Change Request raised from the end user.
- Modifying various existing **Packages, Procedures, Trigger and Functions** according to the new business requirement and carrying out the impact analysis.
- Involved in creation of **Sequences** for automatic generation of Product ID
- Created **Indexes** on the tables for faster retrieval of the data to enhance database performance.
- Used **Pragma Autonomous Transaction** to commit the child transactions without affecting the parent transaction commit status.
- Used **Bulk Collection** for better Performance and easy retrieval of data, by reducing context switching between SQL and PL/SQL engines.
- Handled errors using **Exception Handling** extensively for the ease of debugging and displaying the error messages in the application.
- Involved in tuning the SQL queries when it takes long time to process the request, using Explain Plan, Hints to improve the query optimization.
- Code validation as per client requirement.
- Testing of code functionality using testing environment.

Academic Qualification

Bachelors of Engineering in computer and science Engineering (2019)

Declaration:

I hereby declare that the information stated above is true to the best of my knowledge.
