To seek a suitable and challenging position in any company/organization where I have opportunity to prove my professional abilities and realize my career ambitions. To perform in a competitive professional environment with the aid of academically acquired technical knowledge and to exchange ideas. Seeking a platform to portray my engineering skills and abilities to their best and expand my knowledge by being part of an organization with vision and innovation.

SKILLS

Frontend	ReactJS, HTML, CSS, JavaScript
Backend	Java, .NET, C#
Databases	SQLite

Certificates

- Successfully completed a master “**Data Structure and Algorithms**” in java online course by Great Learning Academy.
- Participated in Introduction to “**Web Design**” 1Day Workshop Organized by SJCIT College.
- Successfully completed in “**Introduction to Python**” in Infosys by springboard.

PROJECTS

Title : Agriculture Intelligence Decision system using Big Data.

Role : Team leader

Team Size : 3 Members

Description : By using this Project we can predict the best crop which is suitable for the land by using Big Data for a particular land/area. we are using your machine learning model to predict the yield and to give an advice to which is the best crop to grow based on some features. We are going to use HTML, CSS and JavaScript for frontend and for backend we are going to flash framework.
