

JITENDRA K. PRADHAN

SENIOR SOFTWARE ENGINEER

CONTACT

 Bhubaneswar, Odisha
 +91-9132644746
 kumarjitu9090@gmail.com

SKILLS

Backend

C#, .NET Core, ASP.NET, Web API, Microservices

Frontend

Angular (2+ / 7), JavaScript, Bootstrap, HTML5, CSS3

Data & Cloud

SQL Server, Spark, Scala, Hadoop, Kafka, Python, Machine Learning

Tools / DevOps

Visual Studio, GitLab CI/CD, Git, Agile/Scrum

EDUCATION

Bachelor of Computer Applications (BCA)

Utkal University, Odisha

EXECUTIVE SUMMARY

Result-driven **Full Stack Senior Software Engineer** with **15 years of total professional IT experience**, featuring **10+ years of dedicated expertise** in engineering high-availability enterprise ecosystems. Proven track record of working seamlessly in 100% remote environments, collaborating with global teams, and integrating robust .NET backends with responsive Angular front-ends and Big Data frameworks.

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Remote)

Feb 2020 – Present

Dell International Services

- Architect, build, and deploy high-concurrency microservices utilizing .NET Core backed by secure, robust Angular user interfaces in a fully remote environment.
- Formulate data processing pipelines leveraging Spark, Kafka, and Hadoop to handle real-time enterprise streaming events, improving data throughput.
- Lead architectural refactoring, custom query optimization, and performance profiling to significantly scale application reliability and slash latency.

Senior Consultant

Jul 2018 – Feb 2020

CIBERsites India

- Architected secure enterprise-scale web applications and RESTful Web APIs using C# and .NET frameworks.
- Engineered reusable modules, spearheaded code reviews, and partnered closely with product owners, architects, and QA in agile environments.

Software Developer

Jun 2016 – Jun 2018

URI Technologies

- Designed and implemented full-stack components for core Asset and Towed Vehicle Management Systems utilizing ASP.NET and Angular.
- Delivered fluid responsive UI layouts and high-availability endpoints capable of handling high real-time user concurrency.

Prior Experience (2011 – 2016): Software Engineer & Tech Associate roles. Worked on .NET application maintenance, database scripting (SQL Server), and initial front-end styling across web-based business management solutions (5 Years).

KEY PROJECTS & CONTRIBUTIONS

ATS (Dell)

High-throughput real-time streaming, tracking, and analytics platform managing complex enterprise pipelines.

Angular Web API
Spark

Towed Vehicle

Real-time logistics platform optimizing vehicle dispatches, towing workflow states, and GPS tracking.

.NET Core Angular
SQL

Asset Mgmt

Highly secure system built for cross-enterprise cataloging, auditing, and organizational asset lifecycles.

ASP.NET Web API
SQL
